Dear FCC, As a truck driver the importance of having up to date weather and road conditions for the area I'm traveling in is of great importance. Knowing the conditions I'm getting into, I can make better decisions as to continue on or to take another route or maybe find a safe place to park until the weather or traffic has cleared. If the NAB is so upset about losing revenue then they should try improving their service so people would not get their outdated information. XM is a service we pay for that gives us valuable information that keeps us safe and up to date in all major areas. I definitely back XM and all of their efforts to provide us the best service that they can.

Thank you
Paul Kennedy
